SAFETY DATA SHEET

LFM 48 W/U SUC-UI according 91/155EWG (replaced by 2001/58EG)

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Product name: LFM 48 W/U SUC-UI
Applications: Solder paste
Supplier: almit GmbH
Dekan-Groh-Strasse 4
D 64720 Michelstadt/near Frankfurt
Emergency telephones: Information-central: +49 6066 96884-0

2. COMPOSITION/INFORMATION ON INGREDIENTS (Wt%)

See section 16 for explanations of R-phrases

3. HAZARDS IDENTIFICATION

The most important hazard and harm

Harm: The inflammation might be caused by coming in contact with the skin.
Moreover, it might influence the central nerve, the alimentary system, the blood formation system, and the liver by keeping inhaling.

Environmental harm: Insoluble in water.
The living body accumulation (concentrate) is not expected.
The content chemical is not biodegradable.

Physical/chemical hazard: Liable to catch fire by heating.
Harmful fume is generated by heating and is emitted.
This product may react with the oxidant and heat may be generated.

The main symptom: Stimulation of eyes and respiratory organs by vapor inhalation.
Headache, stomachache, anemia, vomiting, and paralysis (by absorbing Lead).

Category: Harmful material
4. FIRST AID MEASURES

**General**
Remove victim immediately from source of exposure. Provide rest, warmth and fresh air. When breathing is difficult, properly trained personnel could assist affected person by administering 100% oxygen. If breathing stops, provide artificial respiration.

**Inhalation**
Move the exposed person to fresh air at once.

**Ingestion**
Rinse nose, mouth and throat with water. Drink a few glasses of water or milk. Try to induce vomiting. Get medical attention.

**Skin**
Promptly flush contaminated skin with soap or mild detergent and water. Promptly remove clothing if penetrated and flush the skin with water. Contact physician if irritation continues. When the inflammation is caused in the skin, obtain medical attention.

**Eyes**
Promptly wash eyes by stream water for 15 minutes or more, and obtain urgent medical attention.

5. FIRE FIGHTING MEASURES

**Extinguishing media**
Water, powder, carbon dioxide (CO₂), dry sand, and bubble(for alcohol).

**Special firefighting procedures**
The fire fighting is done from the winward. The fire fighting is done by cutting off the combustion source to the fire, and by using the extinguishing media. Promptly inform to necessary locations and request assistance. Move container to the place of safety promptly avoiding surrounding fire. If it’s not possible to move container, water the container and surroundings for being cold. If the container is in flames, do fire fighting by watering the container and surroundings. Do the fire fighting by using bags of water, the powder, carbon dioxide, and the bubble (for alcohol). Prohibit the entries other than parties concerned to the fire occurrence site surrounding.

**Protective measures in the event of fire**
Wear self-contained breathing apparatus (SCBA) to prevent contact with thermal decomposition products.

6. ACCIDENTAL RELEASE MEASURES

**Personal protection**
Wear appropriate personal protective equipment - see Section 8.

**Spill clean-up methods**
Limit spread of spilled material. Prevent discharge to drainage systems. Collect and reclaim or dispose in sealed containers in licensed waste.

7. HANDLING AND STORAGE

**Usage precautions**
Avoid spilling, skin and eye contact. Eye wash station should be available at the work place. Provide good ventilation. Avoid inhalation of vapours. Persons susceptible to allergic reactions should not handle this product.

**Storage precautions**
Keep in cool, dry, ventilated storage and closed containers.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Ingredient information**
OES = Occupational Exposure Standards (EH40).

**Protective equipment**

Process conditions
Use engineering controls to reduce air contamination to permissible exposure level.
Provide eyewash station.

Ventilation
Provide adequate general and local exhaust ventilation.

Respirators
If ventilation is insufficient, suitable respiratory protection must be provided. If working operation generates dust or spray mist, use respiratory protection with combination filter (dust filter + gas filter).

Protective gloves
For exposure of 4 to 8 hours use gloves made of: Neoprene.

Eye protection
Wear approved chemical safety goggles where eye exposure is reasonably probable.

Other protection
Use suitable protective clothing as protection against splashing and contamination.

Hygienic work practices
Wash promptly if skin becomes wet or contaminated. Promptly remove any wet or contaminated clothing. Wash at the end of each work shift and before eating, smoking and using the toilet. Isolate contaminated clothing and wash before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Paste

Colour
Grey.

Odour
Mild

Solubility description
Insoluble in water. Soluble in many kinds organic solvents such as alcohol (flux).

Boiling point (°C, Flux) >260
Pressure 760mmHg

Melting/freezing point (°C, interval) 217-220

Density (g/ml) 7.4

Temperature (°C) 20

Vapour density (air=1) 6.0

Vapour pressure <0.01 mmHg

Temperature (°C) 20

Flash point (°C) >160

Method Not recorded.

Auto ignition temp. (°C) >300

Flammability limit (%) -

10. STABILITY AND REACTIVITY

Stability
Normally stable.

Conditions to avoid
Avoid contact with strong oxidizers.

Hazardous decomposition products
In usual temperature (<400°C), dangerous decomposition products are not generated.

11. TOXICOLOGICAL INFORMATION

Toxic dose - LD 50:
>

Toxic dose - LD 50 (skin):
>

Health warnings
GENERAL HEALTH HAZARDS.
The sensitizing properties represent the main hazards in industrial use.
INHALATION.
Gas or vapour could irritate respiratory system.
SKIN CONTACT.
Prolonged or repeated exposure could cause severe irritation. Could cause sensitization by skin contact.
EYE CONTACT.
Irritant of eyes and mucous membranes.
INGESTION.
Could cause Stomach ache or vomiting.

Route of entry
Inhalation. Ingestion.

Target organs
Skin
12. ECOLOGICAL INFORMATION

Biotoxicity
Not confirmed.

Bioaccumulative potential
The bioaccumulation (concentrate) is not expected.

Persistence and degradability
The chemical is not readily biodegradable.

13. DISPOSAL CONSIDERATIONS

Disposal methods
Confirm disposal procedures with environmental engineer and local regulations.

14. TRANSPORT INFORMATION

General
Not dangerous according to ADR, RID, IMDG and IATA

15. REGULATORY INFORMATION

Symbol(s)
IRRITANT

Contains
Tin
Silver
Copper
Flux

Risk phrases
R-42/43 May cause sensitization by skin contact.
R-37 Irritation to respiration system.

Safety phrases
S-24 Avoid contact with skin.
S-37 Wear suitable gloves.

16. OTHER INFORMATION

Explanations of R-phrases in Section 2
R-37 Irritating to respiratory system. R-43 May cause sensitization by skin contact.
