

## NEW GENERATION END AND SIDE FEED PNEUMATIC APPLICATORS

Nuova Gamma has recently developed a new type of pneumatic terminal applicators, lighter and functional.

The Gamma's new generation applicators unites the robustness and reliability of the previous models to a more modern design and efficiency.

Choosing best quality materials we can guarantee a longer life for our applicators.

The tooling are inserted into the applicator body this helps and eases the tooling change.

The applicators can be fitted on all crimping presses of the main manufacturers.

Pneumatic terminal applicators set you free to find the best pitch forward regulation.

### TECHNICAL DATA

Stroke	40 mm
Shut height	135.78 mm
Pitch	Up to 40 mm (different pitches on demand)
Wire size	From 0.05 up to 6 sqmm

### ADJUSTMENT HEADS

There are 2 types of adjustment heads available:

- 4 adjustment positions on the wire: A-B-C-D
- Micrometrical adjustment head: 0.025 on the wire, 16 positions 0.1 on insulation

### OPTIONAL

- 6 digit counter

Detail of 6 digit counter and micrometrical adjustment head
