

SP22

PNEUMATIC STEP BY STEP FEEDER FOR THE PREPARATION OF TAPED AXIAL COMPONENTS

SP22.05 CUT BEND AND SWAGE LEADS

SP22.08 CUT AND 90° BEND

SP22.17 CUT AND DOUBLE BEND

SP22.21 CUT AND BEND FOR VERTICAL MOUNT

SP22.25 CUT, BEND AND FORM

Special pneumatic post designed on specific data received by customer for the cut, bend and form of taped axial components. Tape feed occurs on horizontal axis. Components are individually and vertically operated from top to bottom. The leads of the component are held on the right and left sides of the body during the cut. This way all risks of damaging the body are avoided. This position is supplied without electrical, electronic or pneumatic system and it is mechanically operating. Then it can be integrated to an automatic placement system.
